

Data Quality & Data Audit Form (DAF) SOP

- Perform initial QC on raw uploads: completeness, required fields, GPS plausibility
- Run conformity checks: correct formats, units, date ranges
- Check consistency across related records (no conflicting values)
- Document issues on DAF with corrective actions, responsible staff, and timeline
- Approve clean dataset and move to analysis folder; keep raw unchanged with versioning
- Produce quarterly Data Quality Audit Report and track recurring issues
- Ensure MEAL/Data Manager signs off before public release
