

Drone Pre-flight Checklist (RFO)

- Confirm mission objective & obtain CCOPS/Unit Lead clearance
- Check batteries: drone & controller $\geq 80\%$ (min threshold)
- Inspect airframe, props, motors, sensors for damage/cleanliness
- Verify sensor calibration (thermal radiometry, optics) and SD card formatted (U3)
- Confirm telemetry link, GPS lock (≥ 12 sats), and RTK if available
- Set flight parameters: altitude 50–120m, RTH altitude +20m above highest tree
- Define exclusion zones and emergency evacuation routes
- Confirm observer assigned (VLOS) and comms channel open
- Secure takeoff zone (concealed) and check local community presence
- Record preflight in Operations Journal (time, operator, weather)
