

Patrol Digital Intake SOP (SMART/CyberTracker)

- Issue rugged handheld with latest forms to each patrol team; verify battery and storage
- Use standardized observation codes and attach photos where possible
- Log patrol start/end, route, team composition and leader
- If offline, ensure device caches are synced within 24 hours at CCOPS or upload point
- Enter incident classifications consistently; flag urgent alerts to CCOPS via PTT/EarthRanger
- Confirm GPS track integrity and remove improbable spikes during ingestion
- Cross-check patrol reports against tracker telemetry and reconcile discrepancies
